

FOR IMMEDIATE RELEASE

Solar Nation® Installs Solar-Electric System for Atlantic Realty in Secaucus, New Jersey

WOODBIDGE, NJ, July 27, 2011— Solar Nation has announced the installation and commissioning of a 947 kilowatt solar-electric system for Atlantic Realty Development Corporation in Secaucus, New Jersey. Atlantic Realty installed the solar-electric system to reduce and stabilize energy costs and to follow through on its long-standing commitment to environmental stewardship and energy conservation.

The 105,000 square foot solar-electric system was designed, engineered, and installed by Solar Nation. The ground mounted array is comprised of 4,030 SolarWorld® 235 watt solar panels, manufactured in the U.S. In addition to the panels, the system incorporates SMA America inverters and a Draker Laboratories web-based monitoring system. Clean, renewable energy generated by the system would be enough to power up to 97 homes and will meet 63 percent of Atlantic Realty's net metered electricity needs for the currently completed buildings, providing immediate savings for the company.

The installation of the solar-electric system is part of Atlantic Realty's continuing dedication to environmental impact reduction. It is estimated that the development corporation's solar-electric system will cut greenhouse gas emissions by 779 metric tons annually—the equivalent CO₂ offset of planting approximately 19,979 trees.

"We realize the win-win opportunity we had as a company by installing this solar-electric system. We are working to protect the environment for our children, and we are strengthening our company for long term growth at the same time" explained William K. Hayes II, Executive Construction Manager of Atlantic Realty Development Corporation. "Renewable energy is not just a smart environmental policy; it's smart business."

“Atlantic Realty has shown its commitment to sustainability at its facilities. We are proud that they chose Solar Nation to further that commitment to energy conservation. By installing an advanced solar-electric system, Atlantic Realty will realize immediate and long-term savings that will make them an even stronger business in New Jersey, all while reducing emissions and helping the environment,” said Paul Hodge, Chief Executive Officer of Solar Nation.

About Atlantic Realty Development Corporation

Atlantic Realty Development Corporation is a real estate developer with headquarters in Woodbridge, New Jersey. The company develops and manages numerous facilities in New York and New Jersey.
